

## **Contents of the Proceedings of the 13<sup>th</sup> symposium of the Tunisian Mathematical Society, Sousse, Mars 2006**

Quelques aspects d'un processus généralisant le mouvement Brownien dans la théorie de Dunkl.

**Léonard Gallardo**

Hypoelliptic distributions on Chébli-Trimèche hypergroups.

**Khalifa Trimèche**

A characterization of the indécomposable and infinite graphs.

**Pierre Ile**

Cowling-Price and Hardy theorems on Chébli-Trimèche hypergroups.

**Khalifa Trimèche**

Noyau de Peano et intégrales orbitales.

**Jacques Faraut**

Obrechhoff integral transform and hyper-Bessel operators via G-function and fractional calculus approach.

**Virginia Kiryakova**

Beurlin-Hörmander's theorem for the Chébli-Trimèche transform.

**Latifa Bouattour and Khalifa Trimèche**

Direct images of  $\lambda$ -strongly convex functions by proper holomorphic mappings and extensions of currents.

**Mohamed Lassaad Ben Yattou**
