- **Le meilleur article de tous les temps, c'est tout simplement un vrai canular**: Ce canular montre une nouvelle fois le danger des revues prédatrices comptant parmi ces revues bidon, sans véritable évaluation par les pairs et où, moyennant paiement, il est possible de publier vraiment n'importe quoi. Les chercheurs et universitaires sont appelés à faire un ménage radical.

- **A new ad-hoc IMU Committee on Diversity:** Recently, there has been a considerable increase of attention devoted worldwide to the issues of diversity and inclusion. Many institutions and organizations have recognized the need to re-assess their relationship to the issues of diversity and inclusion.

In the past few years, there has been increased attention to diversity in the IMU.

This has been combined with an increased consideration of conflicts of interest and implicit biases. These changes have certainly improved the operations of the IMU.

To build on this, the Executive Committee (EC) of the IMU has decided to create an ad hoc committee called the Committee on Diversity (CoD) that can offer us advice regarding diversity and inclusion.

The purpose of CoD is threefold:

1. Assess how the IMU has performed to date
2. Offer advice on how we can improve our performance
3. Offer advice on how our members (the Adhering Organizations) can improve their performance nationally.

CoD's final report will first be discussed by the EC. The EC will then make its recommendations to be discussed at the General Assembly in St Petersburg prior to the ICM 2022.

The work of the committee will be public, and the committee will be free to seek advice and engage in discussions wherever it finds suitable.

The chair of CoD is Robert Bryant (Duke University, US), and his email address for this is <chair@cod.mathunion.org>. Other members are

Edy Tri Baskoro (Indonesia)

Sophie Dabo-Niang (France/Senegal)

Edray Goins (US)

Anjum Halai (Pakistan)

Gugu Moreira (Brazil)

Philibert Nang (Gabon)

Ngô Bao Châu (US/Vietnam)

Tatiana Toro (US/Colombia)

- **OWSD-Elsevier Foundation Awards for early career women scientists from the developing world:** OWSD is pleased to invite applications for the 2021 [OWSD-Elsevier Foundation Awards](#). These awards reward and encourage women working and living [eligible developing countries](#) who are in the early stages of their scientific careers, having often overcome great challenges to achieve research excellence. Awardees must have made a demonstrable impact on the research environment and must have received their PhD in the last ten years.

The award has an important impact on local research cultures. Previous winners say the awards have had a powerful effect, enhancing the visibility of their past work and creating new opportunities for the future. The awardees are also powerful role models for girls and young women on their countries. You can read more about our past awardees [here](#).

In the past years, each winner received a cash prize of USD 5,000 and an all-expenses-paid trip to attend the annual meeting of [American Association for the Advancement of Science \(AAAS\)](#) in the U.S.A., where the Awards Ceremony took place. However, due to the COVID-19 pandemic, the 2021 annual meeting of the AAAS will be held entirely online. We are currently evaluating other international scientific events and the trip will be confirmed in the coming months according to how the COVID-19 pandemic evolves.

A total of five Awards will be given to women who are within ten years of receiving their PhD and have lived at least 5 of the last 15 years in one of the [66 science and technology lagging countries](#). There will be one prize awarded for each of the four regions of the developing world plus an additional “floating” award for a particularly deserving candidate from any of these regions. Winners will be informed of their selection by 31 December 2020.

The Awards for Physical Sciences are offered in the fields of Chemistry, Mathematics and Physics. Any combination of these fields (i.e. interdisciplinary) is acceptable. You can see a list of eligible disciplines [here](#).

Assessment will be based on the applicant’s achievements in her scientific field, with additional attention paid to evidence of leadership skills, initiative and innovation, as well as to the candidate’s involvement in capacity building, outreach and civic contribution.

For full information on selection criteria and to apply, see the attached Call for Applications or visit [2021 OWSD-Elsevier Foundation Awards](#).

The deadline for applications for this Award is 30 September, 2020. For questions, please contact the OWSD Secretariat at owsd@owsd.net.
